Chemical-Free Skin Health®

Reflex ProBiome • Dramatic Skin • Anti-Aging • Smoothing • Toning

A biome is an ecological community operating together in harmony. Since we began Keys, we have treated the skin and its flora as a biome or eco-system. Reflex ProBiome feeds the community offering functional nutrients for the skin and friendly flora. Chemicals in skin care products destroy the skin's flora and create imbalance on the skin. Reflex ProBiome is designed to restore the balance and make skin look remarkable.

Reflex ProBiome is the culmination of four years of development combining modern skin age reversal without chemicals, hormones, synthetic steroids or fillers. Using Reflex ProBiome, you can expect reduction or elimination of fine lines, reduction of expression lines, skin toning, skin surface sculpting, firmness and more even skin color. The smooth luminescent finish and quick absorption into the skin are hallmarks of the quality of Reflex ProBiome. Simply we would place Reflex ProBiome in any competition against 'any' other anti-aging or wrinkle solutions. Besides our confidence in Reflex ProBiome performance, it is completely made from natural unmodified ingredients.

The secret of Reflex ProBiome is the combination of natural ingredients, the quality of the ingredients and the fact that all ingredients are whole and functional. Functional ingredients are those that are not over-processed and contain the whole properties from nature. Functional ingredients are on purpose and perform needed features and benefits to maximize skin appearance, hydration and skin health.

Reflex ProBiome is made from the purest organic oils assembled to replicate the skin's own sebum while offering tetrapeptides, triglycerides, fatty acids, quadracarotenoids and nutrients that affect skin cell shape and health. Combining Organic Virgin Avocado oil, Organic Virgin Tamanu oil, Shea oil, ancient renowned Black Seed oil, Bergamot essential oil and the undisputable performance of Carrot Seed oil with our own Miras organic extract makes Reflex ProBiome a functional anti-aging product that is created from pure natural ingredients.

Expectations

The only tangible gauge of a product's performance are the results! All the marketing hype, before and after advertisements and claims of other wrinkle serums, creams and toners are just that...hype. More, many products that do actually perform contain either fabricated synthetic ingredients, hormones, modified stem cells or hydroxyl acids to name just a few permutations.

Reflex ProBiome provides:

- ✓ Fine line reduction or elimination
- ✓ Expression line reduction
- ✓ Regenerative skin firmness
- ✓ Keys trademark luminescence
- ✓ Maximum 'Tri-level' skin hydration
- ✓ New smoother skin tone
- ✓ Some skin sculpting
- ✓ More even skin color and appearance

Highest quality ingredients in therapeutic proportions!

Under The Hood • Natural • Vegan • Gluten-Free • Chemical-Free • Performance

Reflex ProBiome performance comes from the highest quality natural ingredients that each adds to a high degree technical functionality. Highest grade ingredients in therapeutic proportions maximizing performance without fabricated chemicals. Here is each ingredient in a brief description. We encourage you to search the internet for more information on each ingredient and you will undoubtedly understand how and why we chose each one.

Organic Virgin Avocado oil is rich in the essential fatty acids Omega 3 and Omega 9 to assist in keeping your skin healthy and hydrated. Virgin avocado oil contains high levels of proteins, minerals and Vitamins A, B1, B2, and D + E. Anti-aging antioxidants are highly compatible with our skin's own sebum phytosterols, provide protection from water loss in the skin and increase the surface lipids. It is great for all skin types from sensitive, dry to oily offering moisturizing, soothing and protection.

Organic Black Seed oil is an ancient remedy that dates back to 900 BC Egypt. It contains 35% oil, most of which are Essential Fatty Acids (EFA's) and 21% protein. The EFA's like Linoleic Acid (LA) and Gamma-Linolenic Acid (GLA) acid help strengthen and maintain cell integrity, heal skin conditions like acne, eczema, psoriasis, reduce wrinkles, and heal wounds.

Organic Virgin Tamanu oil is from Vanuatu. It contains many lipid forms including phospholipids, neutral lipids and glycolipids. Calophyllolide, lactone and calophyllic super-fatty acid offers antibiotic, antiseptic, antiviral and some anti-cancer properties. Globally, it is an anti-inflammatory oil that calms, conditions and smooths skin.

Wild Crafted Ghana Shea oil is a complex fat that contains the following fatty acids: oleic, stearic, linoleic, palmitic and linolenic. It absorbs quickly into the skin acting as a super-emollient with no residue or oily feeling.

Organic Carrot Seed oil is an essential oil pressed from carrot seed. The main constituents of carrot seed oil include a-pinene, camphene, b-pinene, sabinene, myrcene, γ-terpinene, limonene, b-bisabolene, geranyl acetate and carotol. Generally, the oil offers carotene and pure whole vitamin A. It acts as an astringent, hydrator and humectant with strong anti-inflammatory properties while also detoxifying the skin.

Keys Miras® Extract comes from the distillation of forsythia fruit. This is a Keys exclusive development. We work the forsythia fruit and extract it for high levels of Betulinic and Oleanolic acid. These are both naturally occurring pentacyclic triterpenoids which have anti-retroviral, and anti-inflammatory properties, as well as a more recently discovered potential as an anti-cancer agent.

Bergamot Essential oil in Reflex is a non-photosensitive purified oil specifically used for its anti-wrinkle and scar reducing properties. It reduces infection caused by flora imbalance on the skin. The aromatherapy aspects include stress reduction and lowers tension. This calming effect directly benefits overall well-being.

Reflex ProBiome has:

- ✓ No Botox
- ✓ No Estrogen
- ✓ No Steroids
- ✓ No Snake Venom
- ✓ No Leech Extract
- ✓ No Stem-Cells
- ✓ No HLA's
- ✓ No 'Dirty Dozen' Chemicals

Reflex ProBiome Medicinal Aspects

Each ingredient in Reflex ProBiome carries two distinct aspects. One is the appearance it gives the skin and the other is skin health. Every ingredient has a natural medicinal aspect to it offering performance, efficacy and results when it comes to common skin disorders and problems. The quality of the ingredients and the therapeutic proportions provide a level of therapy for the skin. Years of research into natural alternative medicine and the revered properties of natural oils and extracts brings us a wealth of reported benefits to the ingredients in Reflex ProBiome. These include, anti-inflammatory, antioxidant properties, antiseptic, anti-fungal, bacterial and flora balancing added to all the anti-aging regenerative properties. In our tests with these ingredients, our customers have reported dramatic positive results in addressing:

- ✓ Eczema
- ✓ Psoriasis
- ✓ Rosacea
- ✓ Acne
- ✓ Burns
- ✓ Post surgical scarring
- ✓ White dry patches
- ✓ Skin Dryness
- ✓ Cracking lips & skin
- ✓ Skin Itching
- ✓ Pre-Cancerous anomalies

Did you know? *90% of visible skin aging and damage comes from the sun.*
Use a daily sunscreen like Keys Solar Rx to prevent UVA-UVB damage!
